OBJECTIVE

AI /ML Engineer specializing in Deep Learning and Agentic AI, with proven expertise in designing, developing, and deploying over 5 production-ready AI agents on Hugging Face Spaces. Proficient in Python, TensorFlow, and Lang Chain, with strong hands-on experience in building scalable, efficient AI solutions that integrate advanced agentic capabilities..

EDUCATION

B.E in Artificial Intelligence & Machine Learning, Sri Eshwar College of Engineering Expected 2027
CGPA : 8.04/10 Tamil Nadu, India

Bharatiya Vidhya bhavan School (Matric) 2021 - 2023
Percentage : 72.1% Tamil Nadu, India

EXPERIENCE

Machine Learning Engineer - Intern Feb 2026
Payoda Technologies Coimbatore, Tamil Nadu

Developed and trained ML models for real-time detection of mobile phones, multiple-person presence, and no-person scenarios, integrated with gaze tracking and lip-sync analysis for enhanced behavioral monitoring

PROJECTS

AI Proctoring System: Developed an AI-powered proctoring system that detects mobile phone usage, multiple or no-person presence using trained ML models, and integrates gaze direction tracking with lip-sync verification to ensure candidate authenticity during assessments.

Safe Ride Rewards: “SafeRide Rewards,” an AI-powered road safety application that allows citizens to report helmetless riders using GPS-tagged photos. Integrated AI-based verification redeemable at petrol stations.

Glow 24: Developed a dynamic e-commerce website for a hair and skincare product line, incorporating user-friendly navigation dashboard to enhance both customer experience and business operations. [LINK](#)
